

WEBSITES

1. Fit Design London

<https://www.fitdesignlondon.com/>

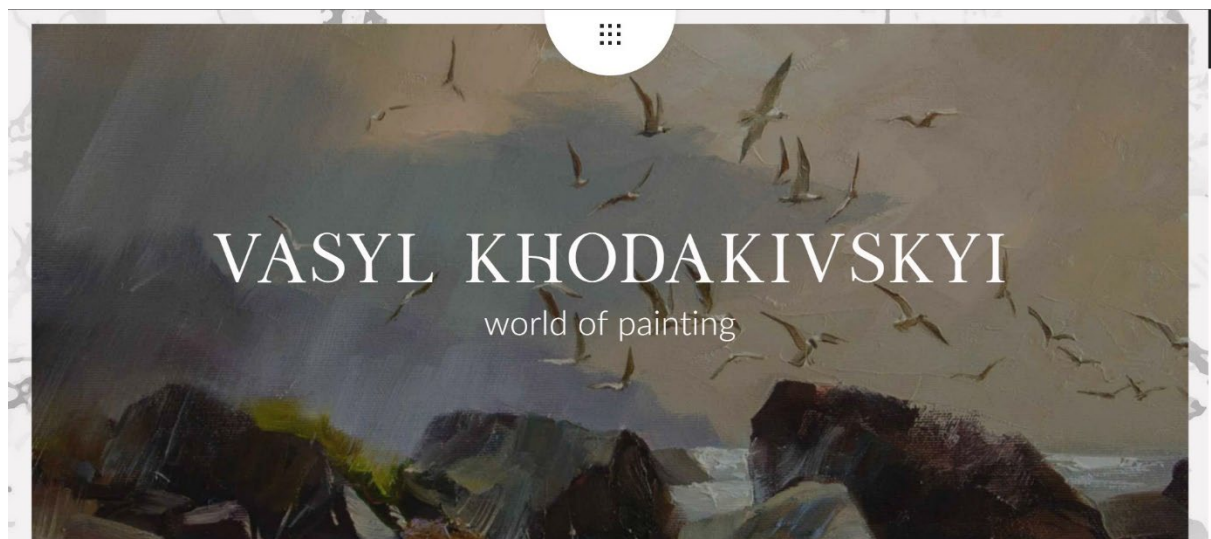

- DESIGN – The design overall is pretty good and sleek. It has a good color combination used which catches a persons eye. The website has a very well layout.

- **USABILITY** – This website is nicely designed to be used by kids, teens, adults and elderly people too. It is an ideal website which can be used by all.
- **CONTENT** – This website has information regarding web design in London. It has enough amount of information nicely spaced out in the website to get an idea to the viewer.
- **CREATIVITY** – I personally like the starting look of the page which has a painting that moves with your cursor moving on the screen. Even the Design Projects part of website is really catchy with the eye designed cursor to have a further look into it.

2. Vasyl Khodakivskyi

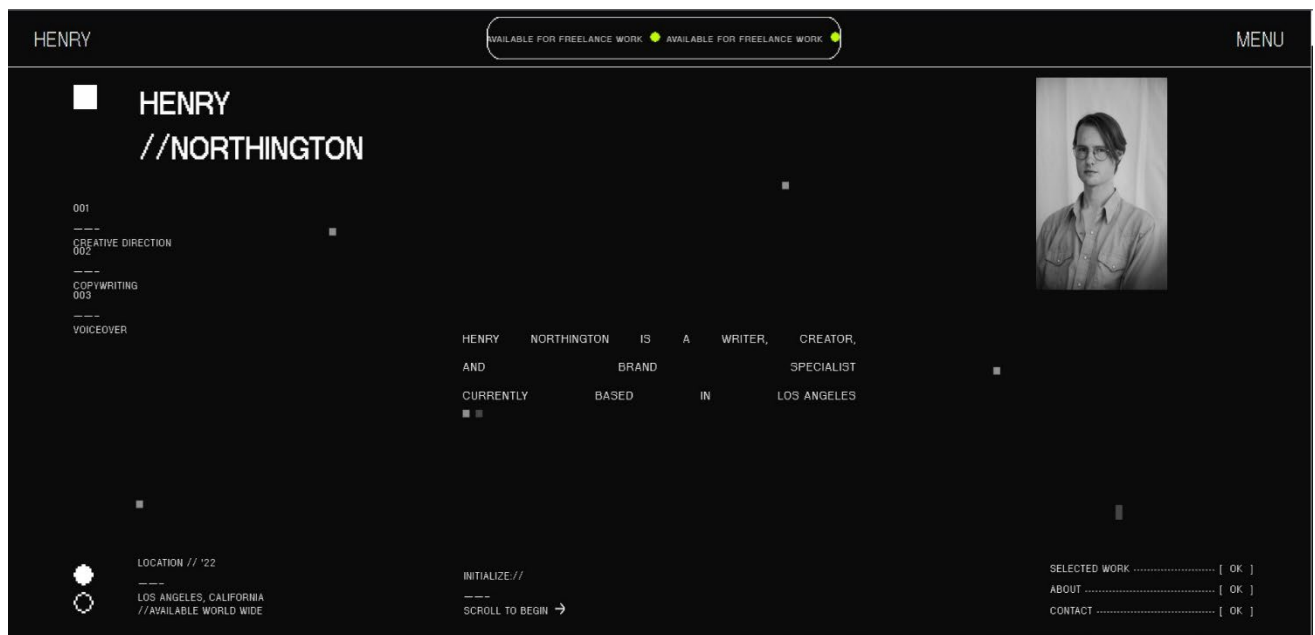

<https://vasyl.khodakivskyi.com.ua/>

- **DESIGN** – The design is amazing and going well along with the theme of the website that is a 3D art gallery.
- **USABILITY** – This website would be tough to use by the elderly people. It would be a little difficult for them to figure out what to do next. But his website compromises an art gallery mostly for young painters and visitors to see his work, so its pretty easy for them to handle the website
- **CONTENT** – It is a more of a visual website because he is showing his art works. But the page listed about him has content very well executed.
- **CREATIVITY** – The creativity of this website is unique and amazing. The way the cursor is used and the art pieces in background going perfectly with the font. Its also having a very subtle nice theme to the website.

3. Harry Northington

<https://www.henrynorthington.com/>

- DESIGN – This website has an amazing black and white themed sleek background with pixel computer theme letters as the font. Overall its an amazing design.
- USABILITY – Its pretty easy to use for all ages as it has all information listed with a menu on top also.
- CONTENT – Content is very well covered including all the details about this person and the work and projects he has done. The services and capability part of the website is the best personally for me as it has information on the left and a small animation on the right.
- CREATIVITY – Nice ideas used for the page and the interactivity of the page with animations and pictures.
